

6516206883.txt

Hi - I've been a subscriber to XM Satellite Radio for six months and have found it to be an excellent service provider of information and entertainment. I even bought my father a receiver and two-year subscription, and continue to sing its praises to everyone.

I am concerned about any restriction on XM radio, as I see it as effort of the commercial broadcasting corporations to restrict competition - much as the large corporations have bought out so many radio stations. The corporations are obviously threatened by Satellite Radio, and I am concerned that this would be a first step in a very wrong direction to eminate this service.

Please reject NAB Petition 04-160.

Thank you,
Anastasia Walsh
